Miscellaneous

Control different settings for important aspects of your website here.

Add missing ALT attributes

Off On

Add missing `alt` attribute for `img` tags in your post contents and featured images. This option will not change the stored content of the post, it adds the attribute on the fly when the content is displayed. You can see [all options we offer here](#).

Rich Snippet

Off On

Use automatic structured data to mark up content, to help Google better understand your content's context for display in Search. You can set different defaults for your posts here.

Description

SEO Plugin For WordPress

★★★★★

SEO is the most consistent source of traffic for any website. We created [Rank Math, a WordPress SEO plugin](#), to help every website owner get access to the SEO tools they need to improve their SEO and attract more traffic to their website.

[TRY THE DEMO](#)

[Features](#) | [Why Choose Rank Math?](#) | [Compare](#) | [Screenshots](#) | [Benefits](#)

SEO might be the best and most **consistent source of traffic** for one's website, but it's not without its quirks. The constant process of optimizing your posts can sometimes take more time than actually writing the content. **If you always feel that you can do more on the SEO front for your website but don't have the time, *then Rank Math is what you're looking for.**

Version: 1.0.16

Last updated: 3 days ago

Active installations: 10,000+

WordPress Version: 4.6.0 or higher

Tested up to: 5.0.3

PHP Version: 5.6 or higher
